

Idea development

Idea description: a 'Configurable Table'

Parts and/or materials used: Top: (panel) door, glass
middle: Radiator (optional)
bottom: Hinges of feet made of the doors

New function of the idea: A table is always needed in a house, and the flat surface of the materials can still be used, even when they are old.

Draw idea:

Can this idea be realized locally? How? For this idea we have to contact someone who can help with creating a configurable production process. So a furniture designer is required.

Where is this idea located on the value pyramid?
Remanufacture.

Are the things, needed to accomplish this, within your reach?
No, we need to make a configurable process for creating the table and then we need to find someone to create the table itself.
